New Hours for 2016

We've been closing at 8 pm Monday through Friday for decades. During those decades, we saw little business in the winter during the last hour, but did significant business during the last hour during Daylight Savings months. Last winter as an experiment we closed at 7 pm for January and February, and as we expected it didn't impact business significantly. In March we went back to our traditional 8 pm closing and watched our sales during that last hour. Over the next 8 months, we only had 2 nights when our sales during the last hour covered our expenses. So, we will continue our traditional hours through the end of 2015, but will permanently start closing at 7 pm during the week at the beginning of 2016.

Holiday Gift Ideas

Our most popular gift option continues to be our gift certificate. We can issue one for any amount. It can be used at either or both Uncles. It can even be used for mail orders, and it can be purchased over the phone (if you have a Visa, Mastercard, or Discover Card) and we can mail it either to the purchaser or to the recipient, or we can just enter the balance on a credit file here in the store to avoid the risk of the gift certificate being lost.

Calendars used to be a very popular gift item, but so many people are now using assorted electrical devices in place of a wall calendar that we substantially reduced our selection of calendars this year. Several of the calendars we did order have not arrived.

We also have lots of signed books, art books, and humor books, including some that can be given to people who don't read sf or mysteries.

How's Business by Don Blyly

I've spent a lot of time trying to keep up with some proposals that the Minneapolis City Council are considering that would impact businesses. My impression is that the proposals were drafted by special interest groups who wanted to accomplish "good" things, who then found a council member or two who were willing to support the proposals. But I thought the proposals were poorly drafted, did not show an understanding of how businesses operate and did not consider unintended consequences.

First, there is a proposal to prevent any Minneapolis businesses from giving out any plastic bags with handles and to force Minneapolis businesses to charge a nickle each for paper bags. This is intended to try to force all customers, whether residents of Minneapolis or not, to switch over to reusable bags when shopping in Minneapolis. I went to a public meeting and also submitted written testimony on this proposal. Imagine going to the grocery store and the person ahead of you in line has a big shopping basket full of food. Under this proposal, the clerk could not start ringing up your purchase until the customer ahead of you had finished packing all of their food so that the clerk would know how many bags to charge for. Now imagine that you are at the back of a long line of people with full grocery carts, and have to endure a wait 2 or 3 times as long because of the new "charge for paper bags" law—how many times would you endure this before you started shopping outside Minneapolis? I also pointed out that because we are so close to the hospital, we have a lot of customers come in on crutches or with canes, and they need a bag with handles to take away the books they purchased. I'm not sure how this proposal is progressing, but I know a lot business people testified that it was badly drafted and would cause a lot of problems as currently proposed.

Another proposal would have raised the minimum wage to \$15 per hour, required businesses to provide sick time, and required businesses to lock in employee schedules 28 days in advance, with extra costs to the employer if the schedule had to be adjusted within that 28 day period. I filled out an on-line survey on this, but otherwise wasn't involved. Most business people seemed to be willing to go along with a sick time plan, but thought the wording on the proposal needed to be adjusted. Both employers and a lot of part-time workers had problems with the rigid 28 day in advance scheduling. A lot of part-time employees, college students and others, said that they valued the flexibility of their current part-time jobs, and feared that employers would be forced to become much less flexible under the wording of the proposal. The increase of the minimum wage to \$15 is no longer under consideration, and there will be a group (to include employees, union representatives, and employers large and small) to study the rest of the proposal and make recommendations.

The minimum wage should have been indexed to inflation decades ago, but it wasn't. As a result, people working at minimum wage are far worse off than they were 30 years ago. Both the federal government and most state governments have started correcting the problem in a gradual progression of increases. But there are some people who want to do much larger increases much faster, and they claim that it will be painless because the increases will all come out of the pockets of the rich folk who own all the businesses. I'd love to be able to pay myself minimum wage for the 70 hours a week I put into my business, and I know there are a lot of other small business owners in the same position. And I haven't noticed many rich folks being eager to reduce their profits by giving big raises to their lower paid employees. Big raises would be paid for by big increases in prices. But that is more of a problem for bookstores than for other businesses. The books come in with the prices already printed on them.

From about 2008 through 2014, prices on books were pretty stagnant. (I read a week ago that name brand prescription drugs went up in price 138% during the same period.) Mass market paperbacks were stuck at \$7.99 (except for a few best-selling authors' books which were put into the "Premium" size at a price of \$9.99), most trade paperbacks were around \$15.00, and most hardcover adult novels were around \$25.00. Then, about a year ago the voters in San Francisco voted in a \$15 minimum wage and Borderlands Books announced that they were going to be forced out of business by the steep wage increase, and the publishers started to take notice. (Many people donated many thousands of dollars to keep Borderlands open.) Many other cities considered or passed \$15 minimum wage laws, and the governor of New York wants to go to \$15 quickly for New York City and more slowly for the rest of the state. And publishers are now putting higher prices on books. We are seeing a lot more regular size mass market paperbacks at \$8.99 and \$9.99, trade paperbacks are \$1, or \$2, or \$3 more than they would have been a year ago, hardcover adult novels are \$2 or \$3 more than they would have been a year ago, and a lot of novels that would have come out as mass market paperbacks a few years ago are instead coming out as trade paperbacks at double the price they would have been as mass market paperbacks. And I expect the prices of new books to continue to go up. If they don't continue to increase, most of the bookstores, both chain and independent, won't be able to afford to operate in a few years. And the more wide-spread the \$15 minimum wage becomes, the faster the publishers will have to increase prices in order to preserve the bookstore distribution channel.

Short Recommendations by Don Blyly

Many of the recently launched “urban fantasy” series were clearly originally intended to be “paranormal romance” series, but when that category imploded, the publishers simply changed the label on the spine. And Kim Harrison and Kat Richardson have ended their long-running and very popular urban fantasy series, leaving people looking for new urban fantasy series that were really written to be urban fantasy.

Spell Blind by David B. Coe (\$7.99) is the best beginning to a new urban fantasy series that I've read in a couple of years. The series features weremystes—people who have magical abilities, but who are also influenced by the full moon. At the time of the full moon, their magical powers become much stronger, but they also go crazy. Justis Fearsson is a weremyste, as was his father. His father was a policeman in Phoenix, Arizona, until the monthly craziness forced him to retire. Justis was also a Phoenix detective, with his partner being the only one in the department who knew his secret. She had been covering for his monthly inability to work around the full moon for years, but eventually the rest of the department became convinced he was either on drugs or an alcoholic, and forced him out of the department. Since then, he's been working as a private investigator. Justis receives a call from his ex-partner, asking for his help. The last case they had been working on involved a serial killer who killed a victim once a month, burning out their eyes. The case is still unsolved, and the serial killer has just murdered the daughter of a senator. Justis' magical abilities are needed to track down the killer, but Justis soon realizes that the killer is a weremyste far more powerful than Justis, and Justis could become the next victim.

His Father's Eyes (\$25.00) is the second in the series, and is also excellent. A third is coming sometime in 2016. David B. Coe has also written a bunch of epic fantasy novels under his own name, which I've heard good things about but have not read. He is also writing a series of fantasy novels set just before the American Revolution under the pseudonym D. B. Jackson, which I also haven't read but plan to sample soon.

Ancillary Mercy by Ann Leckie (\$15.99) is the third in the trilogy after **Ancillary Justice** (\$16.00, winner of the Hugo & Nebula Awards for Best Novel of 2014) and **Ancillary Sword** (\$16.00). The story line takes up right where **Ancillary Sword** left off and stays (mainly) within the same space station. About 30 pages from the end, I had serious doubts that the story line could be tied up by the end of the book, but she did a fine job of it. If the author decides to return to this universe, I'll be happy to read more, but I won't feel cheated if she doesn't return.

Clash of Eagles by Alan Smale (\$9.99) is alternate history, where the Roman Empire didn't fall, and in 1218 the empire can't expand east beyond India because of the Mongols, and the Norsemen have informed the empire of the New World. So a legion is sent to conquer the New World and bring back lots of gold. They land at Chesapeake Bay and fight their way to the city-state of Cahokia (near modern St. Louis), without finding any gold. This is the first of a planned trilogy. Some of his ideas about the native tribes' technology are not credible to me, but he tells a very entertaining story.

The Baba Yaga by Eric Brown and Una McCormack (\$7.99) is the third book in the Weird Space series, after **The Devil's Nebula** (\$7.99) and **Satan's Reach** (\$7.99). This series has a harsh human government ruling thousands of worlds in the Expansion, lots of alien races that are not very powerful, and the alien Vetch empire, which is at war with the Expansion. Beyond the Vetch empire, many humans and others have fled to the lawless worlds of Satan's Reach to escape the war and the government of the Expansion. But a new danger is lurking in Satan's Reach. The very alien Weird have discovered how to invade our universe, and they want to conquer it. They are such a threat that the Expansion and the Vetch stop their war long enough to fight the Weird. Each novel follows a new set of main characters, but it is best to read the novels in order. In **The Baba Yaga**, Expansion fleet intelligence uses the threat of the Weird to take over the Bureau, the civilian intelligence arm of the government, sending some civilian intelligence agents fleeing to Satan's Reach looking for answers. I enjoyed the book, except for the awful proofreading, and the ending of the novel makes me very eager for the next volume.

I received an advance reading copy of Lois McMaster Bujold's **Gentleman Jole and the Red Queen** (\$27.00, due early February, signing at Uncle Hugo's Saturday, February 6, 1-2pm) on a Friday afternoon. By the close of business I was 80 pages into it, and had to force myself to leave it at the store so that I wouldn't show up groggy the next day from lack of sleep. I did take it home Saturday night and finished it before heading to bed. Three years have passed since the death of Aral Vorkosigan. At the time of his death, he was Viceroy and Cordelia was Vicereine of the planet Sergyar, the planet where they had first met in the middle of a war decades before (in **Shards of Honor**, \$16.00 trade paperback or \$22.00 signed hc). Cordelia is still Vicereine, the highest civilian authority for the Barrayaran empire on the planet. Admiral Oliver Jole, who has been very close to Aral and Cordelia for decades, is in charge of the Sergyar fleet. Cordelia returns from a trip to Barrayar, no longer in mourning clothing, and with a bunch of plans that will shake up her life, Admiral Jole's life, and the lives of many other people,

often to humorous effect. Late in the book, when Miles shows up with his wife and six kids to find out what's going on with his mother, he's a somewhat worn-down middle-aged man, far different from the brash young man he was earlier in the series. He learns things about his parents' lives that he had not previously suspected, but eventually learns to cope, in the process forming a more mature relationship with Cordelia.

Shadow of Empire by Jay Allan (\$15.99) is the first of the Far Stars trilogy, with **Empire in the Dark** (\$15.99) coming in early December and **Funeral Games** (\$15.99) coming in early January. The brutal Empire rules most of the human worlds, but there are about a hundred independent worlds among the Far Stars, many ruled by dictators and warlords. The Empire thinks it has the right to rule the Far Stars, but for a long time the governors sent to Galvanus Prime, the supposed imperial sector capital, have been incompetents the emperor wanted to get away from the court. But an ambitious, competent man has become governor and plans to force the independent planets to surrender to the Empire. Smuggler and mercenary Arkarin Blackhawk and the crew of the ship Wolf's Claw join the fight to keep the independent worlds free of the empire. The book is full of flawed good guys, totally evil bad guys, and LOTS of action. It starts with a gladiator-style battle, moves to outer space battles, and then ground-pounder action on assorted planets. It's fun, pulpy adventure, if you're in the mood for that.
