How's Business by Don Blyly

Our business in December was about the same as last year, but for some reason January was several thousand dollars below last January. My theory is that people got so spoiled by the unusually mild early winter, that they over-reacted when normal January weather struck.

Looking over what I wrote a year ago, I realize that this winter I haven't had to deal with any break-ins, leaks from the roof, or medical problems. That's a big improvement.

The U.S. Census Bureau reports that bookstore sales actual rose 2.5% in 2015 after 8 years in a row of decreasing sales. Even with the increase last year, bookstore sales were still down more than 30% compared to 2007. But it's still good news that print book sales are going back up and e-book sales are going down.

Amazon opened a brick-and-mortar store in Seattle, and recently the Wall Street Journal reported that the head of a major national shopping center firm said that Amazon was planning to open 300 to 400 shopping mall stores in the near future. Amazon had no comment, and the shopping center guy backed off his initial statement, but Amazon has been advertising to hire bookstore employees in the San Diego area. Amazon gets a better discount on books than any of the brick-and-mortar stores, so they could certainly cut prices enough to put a lot more brick-and-mortar stores out of business and seize even more market share. After all, when the other national bookstore chains were expanding rapidly decades ago, they were notorious for opening up very near independent bookstores, cutting prices until the independents went out of business, and then raising their prices. With their superior discount from publishers, it would be easy for Amazon to follow the same sleazy plan with regard to both independent and chain bookstores. If Amazon could kill off another of the national bookstore chains, their market share would give them even more negotiating power with regard to the publishers.

I reported last issue about the city of Minneapolis wanting to ban plastic bags and forcing merchants to charge for paper bags. They are holding more meetings on the issue, but it seems clear that they have ignored all feedback that was negative towards their plan. The city's

newest target seems to be drive-through windows, not only at fast-food places, but also drive-through windows to pick up prescriptions (in case you have a couple of sick kids in the car that you don't want to haul through the drug store as they cough on everybody else) and for banks. I get the impression that the current city planning people and some of their very vocal supporters either think that Minneapolis is Manhattan or that it should become Manhattan. Many people in Minneapolis don't agree.

National Independent Bookstore Day is Saturday, April 30. Everyone is encouraged to visit at least one independent bookstore on that day, and buy something as long as you're there surrounded by the books. Come in on National Independent Bookstore Day, spend \$50 or more, and receive a free Uncle Hugo's/Uncle Edgar's bookbag (a \$10.00 value).

A few days before my 65th birthday, I adopted a dog from the Golden Valley Humane Society. Ecko is almost 4 years old, and was described as a very shy blue heeler mix. One look at her face and it was obvious that the mix was with a pit bull. She is very mellow and loves to spend time at Uncle Hugo's. But I know that some people have a dog allergy and some people just don't feel comfortable with dogs, so I don't let her roam around when customers are in the store. When the store is open, she's securely fastened near Uncle Hugo's 40% off book area, where customers who want to visit her can do so (which she encourages people to do), but people who

don't want to visit her won't be bothered by her (except for an occasional whine as she tries to tempt somebody to come and pet her). Over the last six weeks, most customers haven't even been aware of her, and most of the people who have noticed her have been happy to visit her. I know that she came from a family with kids, but so far almost everybody who has visited her at the store has been an adult. If you bring in kids to visit her, please don't let the kids go running up to her by themselves until I have a better idea of how she will react to a perhaps hyper, noisy little one. So far I've seen nothing but mellow behavior (except when she sees a squirrel or rabbit), but let's be careful with kids until I know how she will react.

Closing the store at 7 pm instead of 8 pm Monday through Friday has gone fairly smoothly in most ways, but not in all ways. Last year when we tried out the 7 pm closing for January and February, I was able to edit the Dex Yellow Pages internet listing to change closing to 7 pm at the beginning of January and then edit it back to 8 pm at the beginning of March. But when I tried to edit the hours this January, I found that I couldn't edit Uncle Hugo's hours, and that Uncle Edgar's listing was missing. I complained to Dex, and was given various wrong information about how to solve the problem. I was told that Dex was bought by another company last year, everything was switched to the acquiring company's computer system, and eventually the Dex employees would be trained how to use the acquiring company's system. After

a few weeks, they managed to correct Uncle Hugo's hours, but after 6 weeks they still have not put Uncle Edgar's listing back up (while continuing to list a bunch of bookstores that went out of business 10 to 20 years ago, like Borders on Hennepin Ave., Ruminator books in downtown Minneapolis, and a Brother's Touch). The last time I complained I was told that somehow when everything was switched to the new computer system last year, the listing for Uncle Edgar's (and they have no idea how many other customers) got lost, but now they've finally figured out the problem and Uncle Edgar's listing will be back in place in the next couple of weeks. When I asked about a refund for the months that Uncle Edgar's was not listed on their internet yellow pages, I was told that there would be no refund because the internet listing was free (although the printed yellow pages and the internet yellow pages were sold to me as a package deal).

Since around Labor Day, we have been a UPS Access Point, which was supposed to mean that if the UPS driver couldn't deliver a package to a home within about a mile of the store, the driver would leave a note on the person's door that they could pick up the package at Uncle Hugo's and then the driver would drop off the package at Uncle Hugo's. People who have a pre-printed UPS label for an outgoing package can also drop the package at Uncle Hugo's and we then pass the package along to the UPS driver. UPS pays Uncle Hugo's a very small amount of money for this, but they also stopped charging

us a significant amount of money for picking up our outgoing packages. It soon became apparent that a lot of major shippers choose to have their packages delivered directly to Uncle Hugo's without even attempting to deliver to the home of the customer, which made some customers unhappy with us. But the program also got a lot of local people to stop into the store for the first time, and a few of them bought some books while they were here. When I signed up for the program, they brought out a sample of what the door tag would say, and it showed the name of the store, the address, and the hours. What really happens is the door tag gives the address, sometimes adds "Uncle Hugo's", and never gives the hours. At the beginning of January I went to the UPS Access Point site and changed the hours. But as recently as a week ago, somebody called UPS to find out how late we were open and was told we were open until 8 pm. A few people have been unhappy to have UPS drop their package at Uncle Hugo's, especially if they were waiting at home for UPS to deliver the package and UPS didn't attempt to deliver it to their home. But most people have been happy that UPS dropped their package at Uncle Hugo's instead of just leaving the package in front of their front door or making them arrange transportation to the UPS warehouse during the hours that UPS is open. And many people have been happy to be able to drop UPS returns at Uncle Hugo's. But we've also had to deal with people who grabbed a door tag and came to try to get a package from us while claiming that they don't own a photo ID, or presented a photo ID

showing both the wrong last name and the wrong address. Things have sometimes gotten rather heated with such people, with one threatening to sue Uncle Hugo's if we didn't hand over a package address to somebody else, and one person tried to intimidate one of the clerks until she held up the phone and said, "I'm dialing 9-1-1 right now."

When we closed at 8 pm, I watched very little TV, because by the time I took care of all the end-of-the-day stuff at the store, got home, and made supper, it was almost time for the news, so I'd just read while eating supper and waiting for the news to come on. Now that we are closing at 7 pm, I'm home and supper is made before the beginning of the 8 pm shows, so I've been watching more TV (Lucifer, Second Chance, Marvel Agent Carter) and had less time for reading books.

Short Recommendations **by Don Blyly**

Richard Kadrey is primarily known for his Sandman Slim series, but he is starting a new series. **The Everything Box** (\$24.99, due mid-April) starts about 4000 years ago, right after the Great Flood. It seems that God decided that creating humans was a big mistake, and sent an angel to earth with a doomsday device to finish off any humans that survived the flood. Before the angel got around to using it, a human stole it from him. Jump forward to present-day Southern California. The angel can't go back to

heaven until he finishes wiping out the human race, and he still hasn't found the doomsday device. He's been traveling around the world for the last 4000 years, searching for the device, and trying other ways to kill off the humans. Somehow, the device has made it to Southern California, and he's determined to find it. But so are a pair of competing incompetent cults that want to bring about the apocalypse, assorted collectors who think it is just a very valuable magical heirloom, and the government. Coop is a thief who specializes in stealing magical items. After stealing and delivering a small box to a mysterious client, he comes to the attention of the government and is forced to cooperate with the Department of Peculiar Science, a fearsome enforcement agency that specializes in the odd and strange. The book is less profane than the Sandman Slim series, but is at least as funny. Highly recommended.

Linda Nagata's The Red trilogy (**First Light** (#1, \$9.99), **The Trials** (#2, \$9.99), and **Going Dark**, (#3, \$9.99)) is set perhaps 50 years in our future, and is told from the point of view of Lieutenant James Shelley, the commander of a squad of high-tech soldiers involved in a small war in Africa. As he explains to a new member of his squad: "There needs to be a war going on somewhere, Sergeant Vasquez. It's a fact of life. Without a conflict of decent size, too many international defense contractors will find themselves out of business. So, if no natural war is looming, you can count on the DCs to get together to invent one." So, Shelley leads his

LCS-linked combat squad-out of their small fort, wearing their titanium exoskeletons and wearing their LCS skullcaps which control the implants the army has put inside their brains, carrying their smart weapons, to fight the insurgents. Their helmets provide them with quiet communications among the squad, video feeds from drones, communications with Guidance (an off-site army overseer), and send audio/video feeds from all the helmets back to Guidance. But Lt. Shelley has an uncanny ability to detect danger that the army doesn't understand, and he hasn't lost a soldier in 9 months. And the army is determined to find out how Lt. Shelley always knows when his squad is in danger. Lt. Shelley is in the army to avoid prison time for participating in a protest back in the U.S., and is highly cynical about the government and the defense contractors. As time goes along, his cynical nature is overwhelmed by events. The audio/video feeds from his squad's helmets have been made into a top-rated reality show back in the U.S. without the knowledge or permission of his squad. The defense contractors are certain they can get away with murder because they have bought so many "zombies" in Congress that the government will never investigate them. And then there is the matter of his strange ability to sense danger. The Red trilogy is fast-paced, disturbing, and very well written. In the second volume, Lt. Shelley is on leave, visiting his father in New York City, and the description of his Post Traumatic Stress Disorder while walking down the sidewalk without his armor, his weapons, and his link to Guidance (after relying

on those during his many months in combat) is riveting.

I picked up **Guerilla** by Mel Odom (\$7.99) and was very impressed. Only after I finished the book and started looking to see when the sequel would be out did I realize that I had read the second book of the series without reading the first book, **Master Sergeant** (\$7.99). And I still don't know when I'll be able to read the next book. Makaum is a jungle planet full of deadly plants, insects, and larger critters on land and under the water. Over 400 years ago a generational colony spaceship crashed on Makaum. The survivors of the crash learned how to cope with the planet and developed a low-tech lifestyle. Makaum becomes much more dangerous when the war between the Terrans and the Phrenorians (an empire of scorpion-like beings) reaches the planet. The natural resources of Makaum are desired by the Terrans, the Phrenorians, and other races (who are less militarily inclined than either the Terrans or the Phrenorians, but are just as greedy and more sneaky). And then there are the commercial corps and the criminal gangs who also want to get rich from exploiting the planet. The jungles are full of interesting psychoactive compounds that can be marketed to assorted races. The indigenous Makaums are trying to cope with the invasion of their planet, with some trying to preserve their traditional culture, while others are trying to grab as much wealth as they can from all the competing greedy invaders. Master Sergeant Frank Sage doesn't want to be on Makaum. He wants to

be fighting on the front line of the war, not stationed on a planet that is supposed to be protected by various treaties that everybody is quietly violating. But as long as he's stuck on Makaum, he's going to try to protect the native culture as much as he can from all of the threats, military and criminal. While there's plenty of action in the books, what really impressed me was the depth of cultural detail of all of the many alien races portrayed in the books.

I've already recommended Jacey Bedford's two science fiction novels in her Psi-Tech series, **Empire of Dust** (\$7.99) and **Crossways** (\$7.99). Her first fantasy, **Winterwood** (\$7.99), has just come out, and it is also very good. **Winterwood** is set in England, primarily in 1800, where the government Mysterium regulates magic among the less powerful practitioners, but a few very powerful practitioners have been secretly serving the crown since they helped Queen Elizabeth defeat the Spanish Armada. Rossalinde Goodliffe discovered when she was young that she had some magical ability, but her mother strongly disapproved, and she never registered with the Mysterium. Instead, after her father's death, she helped young pirate Will Tremayne steal one of her father's ships, and began her career as a privateer for Mad King George, preying on the French and Spanish shipping that supported Napoleon. She married Will Tremayne, and after he died she started dressing in men's clothing and became the new Captain Tremayne. In 1800 she is summoned home to her mother's

deathbed, where her mother passes along a magical family heirloom. As she tries to understand the significance of the heirloom and tries to track a family tree that she never suspected she had, one of the secret powerful practitioners for the crown begins trying to kill her. The Forest Lord and his Lady become involved, as do a wolf shapeshifter and the fae. And her pirate crew often are involved. Although **Winterwood** tells a complete story, a sequel is planned, as well as more novels in the Psi-Tech series.

Miss Qiunzella Thiskwin Penniquiquil Thistle Crumpet's Camp for Hardcore Lady Types is definitely NOT your average summer camp, as teens Jo, April, Mal, Molly, and Ripley learn in **Lumberjanes Volume 1: Beware the Kitten Holy** (\$14.99 trade pb, ages 10 and up, full color graphic novel). One night, when they spot a woman who turns into a bear, they sneak out of their cabin and follow her into the woods, only to find themselves doing battle with a pack of 3-eyed foxes. Their counselor Jen catches them on their way back into camp, but the disciplinary meeting with camp director Rosie takes an odd turn: instead of calling their parents, she listens to their story, then tells the girls they'll see stuff they might not understand this summer, but that they're tough enough, and they should stick together no matter what. Good advice, because the next day finds

them facing a river monster, navigating the traps in a hidden cave by solving a series of puzzles, and more. But can they elude the over-protective Jen long enough to accomplish what they need to? The fun continues in **Lumberjanes Volume 2: Friendship to the Max** (\$14.99), as they deal with more mysterious goings-on and supernatural hijinks. Whether they're following a plan or dealing with unexpected events on the fly, the girls stick together. It's fun to see how their different skills - math, verbal, feats of strength and athleticism, and sheer derring-do - all come into play as they face each new challenge. Fortunately for Jen's peace of mind, when she expresses her uncertainty about her work at the camp, Rosie assures her that the girls don't need Jen to punch a bear - they handle that just fine on their own - they need someone smart and practical to keep them from getting in over their heads. (When Jen says that's OK, but sounds dull, Rosie suggests studying martial arts.) From that point on, Jen is in on the action, and finds her own particular ways to contribute. These graphic novels are packed with action, surprises, humor, and smart, strong women, and I'm really looking forward to **Lumberjanes Volume 3** (\$14.99, expected in early April).

Amy Stewart's **Girl Waits with Gun** (\$27.00 hc, \$14.95 trade pb expected in May) is fiction based on historical events. New Jersey, 1914: The Kopp women - 35-year-old Constance, tall and formidable, 31-year-old Norma, short, stocky and sour-tempered, and 16-year-old Fleurette,

petite, sheltered, and excitable - are headed into town to run errands when their buggy is smashed by a motor car. With plenty of witnesses and no doubt as to blame (although the driver and his ruffian friends claim the Kopp's horse was responsible), Constance demands the man's name and address so she can send him an invoice for the repairs. The driver, Henry Kaufman, runs his family's silk-dyeing factory in town, so when she receives no reply to her letter requesting repayment, Constance heads to the factory to confront him. He refuses to pay, and threatens to come by their farmhouse, specifically asking which room is Fleurette's, at which point Constance slams him against the wall and flees. When a brick wrapped in a threatening note comes crashing through the farmhouse window, she goes to the police. Sheriff Robert Heath has had trouble with Kaufman before - in fact, Kaufman is a well-to-do ne'er-do-well, whose position as factory owner has insulated him from punishment for his crimes. As the harassment continues, Constance is frightened, but willing to help get this troublemaker put away, and Heath is determined to protect the Kopp's and get evidence of Kaufman's misdeeds that will stand up in court. Interspersed with the main storyline are details of the Kopp's home life, flashbacks about Constance's background, and subplots about the power factory owners had over their employees and the abuses that occurred as a result. Not only is Constance tough and protective of her family, but she's willing to undertake a side investigation to right a wrong for a factory

girl. In real life, Constance became one of the first female deputy sheriffs, and I'm happy to report that her fictional adventures will continue in **Lady Cop Makes Trouble** in fall 2016.

I love elephants, so when I read about **The Unexpected Inheritance of Inspector Chopra** by Vaseem Khan (\$15.99 trade pb), in which a retiring police inspector finds himself in charge of a baby elephant, I had to check it out. Ashwin Chopra grew up in a poor Indian village, joined the police force, and now calls Mumbai home. After 30 years on the force, heart trouble is pushing him unwillingly into early retirement. On his last day on the job, he arrives at the police station to find a woman wailing that her son Santosh's death will never be properly investigated because their family is poor. Inspector Chopra tries to order an autopsy, but his superior insists it's an open and shut case, and in any case no longer Chopra's concern. Then Chopra arrives back home to find a baby elephant in the courtyard of his apartment complex, much to the displeasure of Mrs. Subramaniam, who heads the complex's Managing Committee. Luckily, Chopra's wife Poppy is more than happy to thwart Mrs. Subramaniam's attempts to make trouble. But why would his eccentric Uncle Bansi send him a young elephant? The next day, when he learns that his successor has no intention of looking into Santosh's death, Chopra decides to pull a few strings with some of his former colleagues. An autopsy reveals that Santosh's death was deliberate, not accidental, and provides a few clues about the

murderer, and Chopra decides to do some poking around on his own to get to the truth. At the same time, little Ganesha the elephant is unhappy and won't eat, and Chopra has to seek advice on how to care for him. Chopra's investigation into Santosh's death leads to a lot of unpleasant surprises, as well as the discovery that, when you're outnumbered by armed thugs, even a small elephant can be a big help. Chopra is an entertaining sleuth, honest to the core and determined to fight the injustice and corruption he finds, if occasionally nonplussed by the situations he winds up in while searching for answers. I'm looking forward to the arrival of the next book, **The Perplexing Theft of the Jewel in the Crown**, in late summer 2016.
