### **Parking**

Metered parking (25 cents for 20 minutes) is available in front of the store. Meters are enforced 8am-6pm Monday through Saturday (except for federal holidays). Note the number on the pole you park by, and pay at the box located between the dental office driveway and Popeyes driveway. The box accepts quarters, dollar coins, and credit cards, and prints a receipt that shows the expiration time. Meter parking for vehicles with Disability License Plates or a Disability Certificate is free. (Rates and hours shown are subject to change without notice - the meters are run by the city, not by us.)

Free parking is also available in the dental office lot from 5pm-8pm Monday through Thursday, and all day Friday, Saturday, and Sunday.

The **44th Anniversary Sale** runs Friday, March 2, through Sunday, March 11, giving you two weekends to take advantage of the sale. March 2 marks Uncle Hugo's 44th anniversary. Come into Uncle Edgar's or Uncle Hugo's and save 10% off everything except discount cards, gift certificates, or merchandise that is already marked 40% off. A discount card will save you even more - you'll get both 10% savings from the discount card and 10% off from the sale. (Sale

prices apply to in-store purchases, but not to mail, phone, or website orders.)

### **New T-shirts & Sweatshirts**

We are pretty low on Uncle Hugo's/Uncle Edgar's T-shirts, but it doesn't make sense to invest in new T-shirts in the middle of the winter. We will be ordering a new printing of T-shirts and sweatshirts around the end of March. We normally order T-shirts in sizes adult small through XXL and sweatshirts in sizes adult large through XXL, but we can order smaller or larger sizes if we know that you want them before we place the large order. The last time we ordered them, two years ago, the prices had not changed from two years before that, and we don't expect the price to have gone up much since then. The current prices are \$14 for T-shirts in sizes up through XL and \$17 for XXL; for sweatshirts the current prices are \$27 for sizes up through XL and \$30 for XXL. Add on a few more dollars if you want to order an XXXL, and even more for XXXXL.

The shirts either have Uncle Hugo's on the front and Uncle Edgar's on the back, or Uncle Edgar's on the front and Uncle Hugo's on the back. For sweat shirts we usually go with ash (light grey), Kelly green, purple, red, and royal blue. We usually do about 10 different colors for the T-shirts (the same colors as for the sweatshirts, plus black, gold, and a few other colors). The T-shirt manufacturers take some colors out of production and introduce some new

colors each year, and we aren't sure yet which additional colors will be available this year.

If you are interested in placing a special order, let us know before the end of March what size you want, which logo you prefer on the front, whether you want a T-shirt or sweatshirt, and your preference for color. An e-mail would probably be best so that we know how to contact you when we find out what the cost will be and to contact you again when the shipment comes in.

### **How's Business by Don Blyly**

Nationally, bookstore sales went down 6.4% in November over the year before (when sales were very poor because of the election), while all of retail went up by 6.6%. For the first 11 months of 2017, bookstore sales went down 3.1% while all of retail went up 4.2%. Nationally, bookstores sales were down 8.2% in December. ("Bookstores" includes college stores, religious book stores, independent bookstores, chain bookstores, any stores where over 50% of the

merchandise is books and periodicals. "Sales" include total sales, for both books and other items carried by the stores.) Barnes & Noble announced that their holiday sales went down by 6.4%. Barnes and Noble said that the biggest decline was in their non-book categories, but their book sales were down 4.5% compared to the year before. At the Uncles, December sales were up quite a bit, and I've heard the same is true of many other independent bookstores.

Nationally, January book sales were up because of enormous sales of *Fire and Fury: Inside the Trump White House*, but the story was different at the Uncles. Between all of the unusually low temperatures and the heavy snow, we were down about as much in January as we were up in December. Fortunately, we still had some of the December money in the bank to pay the January bills.

Then Super Bowl week struck. We didn't expect that many people who would be coming to town for the Super Bowl would be interested in books, but we didn't foresee a huge drop in business from our regular customers. We heard of people who work in downtown Minneapolis and have long-term parking contracts who were told that they could not park in their parking spots for the entire week before the Super Bowl because the city had promised the NFL that those spots would be available for the tourists. A lot of the streets in downtown were closed down for the entire week before the Super Bowl, some for security reasons near the stadium, but many more to make room for

assorted Super Bowl stuff around Nicollet Mall. Downtown was such a mess that many businesses told most of their workers to not come downtown for the entire week. Many of the small restaurants in downtown that serve the office workers saw their business plummet, while the expensive restaurants and the bars in downtown did very well from the Super Bowl crowd. The Mall of America apparently also did very well, with both teams staying there and sports radio stations from all over the country setting up stations there.

Many of our customers who normally stop by the store on the way home from work, didn't do so because of all the downtown disruption. I've heard that many other business outside of downtown also saw their sales go down during the Super Bowl period. As far as we can tell, we didn't sell a single book to the Super Bowl crowd.

But some businesses did very well. I saw a TV report that all of the hotels near the airport were charging \$600 per night or more during the week before the Super Bowl, and the downtown hotels were charging a lot more than that. I saw another report on the series of run-down older motels along University Ave., where the normal \$90 per night charge went up to \$500 to \$900 per night, and the TV crew showed how shoddy the rooms were, with cigarette ashes left behind in no-smoking rooms, garbage left behind under little refrigerators in the rooms, and it didn't

look like a maid had cleaned under the beds in the past year.

The advance claims for the number of visitors for the Super Bowl ranged from 100,000 to over a million. I found out how the NFL came up with a million out-of-town visitors. Let's say you live in Minneapolis, and you bought a ticket for the zip-line across the Mississippi River (the tickets for which sold out in hours, long before any of the Super Bowl people had shown up), you bought a ticket to the Super Bowl exhibit at the convention center, and you went to a couple of the music events-congratulations, the NFL counts you as 4 out-of-town visitors brought to town for the Super Bowl. They counted the number of people that showed up at every Super Bowl related event, and then added up all those attendance figures from events that stretched over more than a week, and then claimed that this showed that over a million out-of-town tourists had shown up for the Super Bowl.

Some local people came up with the idea of making it easy for people leaving town after the game to donate their parkas (bought by lots of visitors once they got to town and figured out how cold it was) on the way out of town back to warmer climates, and a bunch of hotels and a couple of private airports supported the effort, but the main airport refused to cooperate. Still, a lot of very good, new parkas were donated to local homeless shelters, and a lot of food from Super Bowl events was also donated to homeless shelters.

We've been with the same bank since 1977. Starting around the first of the year, I started noticing strange things happening at the bank. When I took in a deposit, one teller always insisted on running the bills through a counting machine, even if there were only 4 bills in the deposit. I thought that perhaps the equipment had been upgraded to catch counterfeit money. (One of the fast food places I visit frequently had installed a new small machine that they passed all bills through. And then we had a counterfeit \$20 passed at Uncle Hugo's, only the second time this has happened in 44 years. After we were tipped off that the guy who had just given us the \$20 for a candy bar had been thrown out of another nearby store a few minutes earlier for trying to pass a counterfeit \$50, it took us a while to find anything visibly wrong with the \$20. The Federal Reserve emblem on the left side of the real \$20s was very sharp and very black, while the emblem on the counterfeit \$20 was very blurred and was dark blue. Everything else on the counterfeit bill looked perfect.) Then the bank started insisting that I had to provide identification before they would allow me to make a deposit to the company account. Then one day I took in a deposit, provided identification, and after the deposit was done I asked to swap a \$50 bill for 50 \$1 bills. I once again had to pull out my driver's license so that the clerk could enter the information into the computer again, and he told me to expect this to happen every time I did a "cash transaction" at the bank. I mentioned this

to one of the employees at the Uncles who has a personal account at the same bank, and he said he hadn't noticed anything like that. A week later, he told me that he went into the bank to make a modest cash deposit to his account, and he had to provide identification and tell the clerk what he did for a living before they would accept the cash deposit. I guess Big Brother is watching a lot harder than he used to. And I wonder if this is coming from IRS or ICE. As much as I dislike this new way of banking, I'm sure than most of the immigrant-run businesses in south Minneapolis are even more concerned about it.

### **Short Recommendations** **by Don Blyly**

**Noir** (\$27.99, expected mid-April) is the latest sarcastic, satiric novel from Christopher Moore. I read and enjoyed many of Moore's previous 15 novels, most of which have a fantasy element, so I immediately grabbed the advance reading copy of **Noir**. It's enormous fun, but doesn't introduce any fantasy or sf elements until almost 250 pages into the novel. In the Summer of 1947, a dame walks into a scruffy gin joint in San Francisco and starts talking to the bartender, who soon decides to help her. Moore has the noir patter down, but twists it in strange ways, to humorous effect. The novel touches on the racism of the period, has a very crooked cop, and has flashbacks to things that happened during the war. But the main plot gets stranger and stranger as the book progresses. In

an afterword, Moore says that he set out to write dark noir, about some poor working mug and the dangerous dame who tumbles his life. Instead, he ended up with "Perky Noir". This novel should be a delight to both science fiction and mystery readers.

**A Call to Vengeance** by David Weber, Timothy Zahn, and Thomas Pope (\$25.00) is the third book in the Manticore Ascendant series after **A Call to Duty** (\$7.99) and **A Call to Arms** (\$7.99). They are labeled as Honorverse novels, but take place long before there is a Harrington in sight. This series should be read in order, but can be read without having read the Honor Harrington series or the other prequel series to Honor Harrington. This series is primarily military science fiction with lots of action, but with some political intrigue going on in the background. I enjoy this series more than I do the Honorverse novels that take place after the main Honor Harrington novels. The ending of **A Call to Vengeance** makes it clear that more novels will be coming.

**The Long and Short of It** by Jodi Taylor (\$12.99) is a collection of short stories set in the Chronicles of St. Mary's, where historians use time travel to do their research. I've enjoyed all eight of the novels that have come out, but I usually enjoy novels more than short stories. While most of the short stories in this book were reasonably good, I still prefer the novels. But the final short story was laugh-out-loud funny. St. Mary's is looking for a new source of

funding, Dr. Bairstow has invited Calvin Cutter, a movie producer, to St. Mary's, and orders Max to try to convince him to hire St. Mary's to do historical research and costume design for his future movies. Cutter is notorious for never getting his facts straight or getting the costumes anywhere near correct. The resulting "sales pitch" by the St. Mary's crew is hilarious.

I read the third books in three trilogies that I've been following and recommending, and I found the ends of the three books interestingly different.

**Nimbus** by Jacey Bedford (\$7.99) is the third in the Psi-Tech series, after **Empire of Dust** (#1, \$7.99) and **Crossways** (#2, \$7.99). Some humans with a bit of psi ability have their abilities artificially enhanced by large corporations so that they can be rented out to help new colony planets. But the corporations are crooked, money-grubbing, nasty super-powers within the human society. Some of the psi-techs have broken free of the corporations, resulting in a war between the free psi-techs (and their regular human allies) and the nasty corporations. There are also side-plots, such as the intelligent life-forms that live in "foldspace" (the equivalent of hyperspace in many other sf series). The story arc comes to a satisfying ending, but Bedford then goes searching for every loose end from the entire series, and ties them all up. I suspect this means that Bedford

is totally, completely done with this series and wants to move on to something new.

**Eagle and Empire** by Alan Smale (\$9.99) is the third in the Clash of Eagles trilogy, after **Clash of Eagles** (#1, \$9.99) and **Eagle in Exile** (#2, \$9.99). In this alternate history, the Roman Empire has not fallen when the Mongol horde comes calling. After fighting to a stalemate in Central Asia, the Roman Empire sends a legion to the newly discovered North America, hoping for an easy victory and a new source of gold. Things do not turn out well for the legion. In the second book, the Roman Emperor comes in person with several more legions, having learned that the Mongols have also discovered North America and sent off an army to conquer it. Instead of conquering all the native tribes as he had intended, he is forced to accept an alliance with them. The third book is the story of the war for control of North America between the Romans and their allies from east of the Rocky Mountains versus the Mongols and their allies from west of the Rocky Mountains. As in the first book, there are plot elements that I'm very skeptical of from an engineering viewpoint, but he sure tells one heck of an exciting story. The story arc is tied up, so there is no need for any more books, but there are a few things left hanging that could lead to a new book, and I'd be happy to read more from this author.

**Beyond the Empire** by K. B. Wagers (\$15.99) is the third in the Indranan War trilogy, after

**Behind the Throne** (#1, \$14.99) and **After the Crown** (#2, \$15.99). Over a thousand years before the story starts, the diaspora from Earth resulted in the Indranan system being settled primarily by people from India, who set up a Hindu matriarchal system of government. By the time the story starts, the modest Indranan Empire consists of forty-five planets spread over twenty-eight star systems, surrounded by other, larger empires. Princess Hailimi Bristol was the middle of three daughters of the empress, but she was never happy living in the royal court. Twenty years before the story starts, her father was murdered, and she fled the empire to try to track down the man behind the murder. After she lost his trail, she decided that she preferred being free out in the galaxy rather than being a surplus daughter at the royal court. She became one of the top gunrunners in the galaxy, with many high-level criminal contacts. After twenty years of freedom, the empire tracks her down and forces her to return to the royal court. Both of her sisters have been murdered, and she is now the heir. She doesn't want anything to do with the royal court, and most of the members of the intrigue-ridden court don't want her back. But it soon becomes clear that the empire needs her gunrunner attitudes and connections if it is to survive, and she starts kicking ass, inside and outside the royal court. The third volume ties up the story arc, as she overthrows the traitor who tried to steal the empire and confronts the man who has been killing off her family. But at the end of the book, we get a little piece of

There Before the Chaos, the first of the Farian War trilogy. It seems that at the edge of human space, alien trouble is brewing, and many of the characters, human and alien, from the first trilogy will be deeply involved in the next series. The first of the new series is supposed to be published sometime in Fall 2018.

I enjoyed **Her Brother's Keeper** by Mike Kupari (\$7.99) when it came out a little over a year ago. Catherine Blackwood is captain of the privateer Andromeda and is hired by her estranged father to rescue her brother, who went to the planet Zanzibar to search for alien archeological treasure, but is now being held for ransom by a local warlord. While I enjoyed the fast-paced space opera, I was really impressed by the universe, full of ancient artifacts, alien races, and a complex history. I was hoping that we'd get a lot more backstory to flesh out the universe. **Sins of Her Father** (\$16.00, due early March) is the second in the series. Captain Blackwood and Andromeda are hired for another fast-paced mission, and many of the other characters are back. Along with all the action, we also get to see more aliens, more ancient artifacts, and more history.

Tim Pratt has written a bunch of fantasy novels, as either Tim Pratt or T. A. Pratt, but I haven't read any of them. **The Wrong Stars** (\$7.99) is his first space opera, and I started hearing very good things about it almost immediately. It's been on Uncle Hugo's bestseller list for 3 months in a row. It is now

a finalist for the Philip K. Dick award for best paperback original of 2017. Five hundred years before the story begins, Earth was a real mess and sent out a large number of "Goldilocks" ships, with a small frozen crew and lots of biological samples, hoping to find a planet that was just right for terraforming. Then a ship full of aliens popped out of a wormhole near Jupiter, with a lot of tech to sell to Earth in exchange for the right to settle Venus, and explained how the galaxy operated. The humans agreed to the deal, the aliens handed over some tech, went to Venus, and refused to have anything else to do with the humans. Then a second batch of aliens came through the wormhole, told a totally different story about how the galaxy operated, claimed that the first shipload of aliens were a bunch of liars, and offered to trade more tech for Mercury. Before the humans had a chance to accept this offer, a third batch of aliens came through the wormhole, claimed that both of the first two batches of aliens were liars, gave a third explanation of how the galaxy operated, and had more tech to trade. The humans now refer to all of the aliens as the Liars, and find that they lie about their tech as much as they lie about everything else, but by being very careful with the trades the humans have managed to clean up Earth, expand throughout the Solar System, and set up colonies around 29 other stars. As the story begins, Captain Callie Machedo and her very odd crew on the privateer ship White Raven discover an ancient Goldilocks ship that apparently has popped out of a previously unknown wormhole

beyond the orbit of Neptune, with only one of the crew on board, in a cryosleep chamber. They manage to rescue the frozen crew member, thaw her, and learn what happened to her ship and her crew mates. They take some alien tech that had been attached to the Goldilocks ship and head for the headquarters of the Trans-Neptunian Authority. Callie keeps their finds secret, goes to the head of security and spins a tale of needing upgraded weapon systems to go after a pirate base, and then takes off with the new weapons to try to save the rest of the crew of the Goldilocks ship. As the story unfolds, the crew learns the truth about the Liars and about how dangerous the galaxy really is. I'm eagerly waiting for the next in the series.

I've heard a lot of good comments about the Laundry File books by Charles Stross. I had previously read perhaps ten novels by Stross and enjoyed them all, but had not read any of the Laundry File series. I walked over the used shelf and found a copy of **The Apocalypse Codex** (#4 in the series, winner of the Locus Award for best fantasy of the year). That introduced me to the basic concept of the series and the main character. It seems that in addition to our universe, there are many other universes (often filled with many-tentacled beings who want to come and eat us), and the walls between the universes are getting thinner. Computer programmers and mathematicians sometimes do things that make the walls thinner, and they have to be stopped before the Earth becomes overrun by bad things from other universes. Bob

Howard was caught accidentally doing some dangerous programming and was forced to become part of the Laundry, a top secret British agency that tries to protect our reality. (It is called the Laundry because during World War II they were in a building with a laundry on the first floor, fighting again the Nazi attempts to bring in supernatural help from other universes.) The Laundry is a government bureaucracy where most of the potential troublemakers are kept too busy with make-work projects and committee meetings to be able to accidentally destroy the world. But a small percentage of the people actually do useful work to save the world. Bob is gradually becoming one of the useful agents, although it takes him a while to realize this. **The Apocalypse Codex** involves a slick American televangelist who is getting far too much influence with the Prime Minister. Some rules are bent, and Bob is sent to America to work with some External Assets (secret agents who work with the Laundry, but not for the Laundry, thus providing plausible deniability if they get caught) to find out what the televangelist is up to. Bob gets much more involved than the Laundry had intended. I then read **The Atrocity Archives**, which was the first book in the series and also the first book that Stross got published. It's not bad, but Stross has become a much better writer since then, and I'm not sure if I would have continued with the series if I hadn't already read one of the later, better books. Next, I picked up **The Rhesus Chart**, the fifth book in the series. Investment banker vampires. Bob has his hands full. The series has much more

British slang and IT slang than any of the other Stross books, but also more humor than his other books. I'll probably be reading the rest of the series as I find the time. The correct reading order is **The Atrocity Archives** (\$8.99), **The Jennifer Morgue** (\$7.99), **The Fuller Memorandum** (\$7.99), **The Apocalypse Codex** (\$7.99), **The Rhesus Chart** (\$7.99), **The Annihilation Score** (\$7.99), **The Nightmare Stacks** (\$27.00), and **The Delirium Brief** (\$25.99), with another coming in July, 2018.

**A Fistful of Elven Gold** by Alex Stewart (\$16.00, due early April) is a light humorous fantasy, featuring gnome bounty hunter Drago Appleroor, who gets caught in the middle of a violent conflict between the elves and the goblins. The elves have been hiring hit men and bounty hunters in the port city of Fairhaven to go upriver and kill a goblin bandit leader. Goblins have been killing the bounty hunters before they have a chance to leave town. Now the goblins are trying to kill Drago even though he turned down the elves. He decides to take the money from the elves and head upriver to save his life. This sort of light fantasy used to be a major part of the field. Think of Piers Anthony's Xanth series, Robert Asprin's Myth series, John DeChancie's Castle series, multiple series by Lionel Fenn, Esther Friesner, and Craig Shaw Gardner, plus lots of Tom Holt books. While I enjoyed Stewart's book, I'm just not as interested in this sort of book as I once was. I prefer humorous fantasies like Glen Cook's Garrett series or Christopher Moore's books,

where the characters are more developed and the plots more complex.
